

# 105mm NATO artillery ammunition

Nexter Munitions offers a comprehensive range of NATO standard shells with proven reliability and high terminal effectiveness. These can be fired especially by the Nexter Munitions' LG1 MkII 105mm guns, British L119 LG guns and upgraded USM 101 guns. The high-explosive or phosphorous smoke shells fitted with base-bleed units can achieve a range of up to 17km.
