Gas Mask Equipment for the Armed Forces

Masks

USE

Its innovative design guarantees total safety

- available in 4 sizes which can be adapted to any face shape.
- Very large panoramic vision
- Ergonomically shaped to provide comfortable wear for periods of longer than 24 hours
- Very high level of air tightness
- Many interfaces and accessories enabling the mask to be worn in a variety of operational conditions (voice amplifier, optical insert, carrying bag, filter canister...)

Used by French and Foreign Defense Forces.

FEATURES

Gas mask for use against toxic agents ensuring air tightness between the face and ambient atmosphere

It includes:

- An ergonomic face cover
- A panoramic flexible and robust visor, moulded with the face cover,
- An internal semi-mask
- An anti-fog deflector to channel inhaled air onto the visor
- Two exhalation valves and one inhalation valve
- A standard female threaded connector conforming to EN148-1 and Stanag 4155 Standards
- A phonic membrane guaranteeing proper speech transmission
- A set of adjustable straps, enabling suitable face adjustment

PERFORMANCE

Weight < 500g

Mask air tightness to 0,15 µm aerosols > 5.10⁻⁵
